

SHRIYA VERMA

Aspiring Data Analyst | Advanced Excel | SQL | Power BI

Lucknow, Uttar Pradesh, India – 226029 | vermashriya1176@gmail.com | +91 9453994166 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Commerce postgraduate transitioning into Data Analytics, with a strong foundation in data analysis, SQL programming, and problem solving. Hands-on experience analyzing datasets to identify patterns, trends, and actionable insights, with a strong interest in working with numbers and data. Demonstrated ability to work independently and within teams, navigate ambiguous problems, and apply critical thinking to develop practical, data-driven solutions.

KEY SKILLS

Skills : Advanced Excel, MySQL, Power BI, Tableau, Python

Core Strengths: Problem Solving, Critical Thinking, Communication, Attention to Detail

FEATURED PROJECTS

EV Charging Network Usage Analysis | Excel | [GitHub](#)

- Analysed EV charging sessions across **8** cities using Excel to evaluate revenue, energy consumption, station utilisation and customer experience, identifying **₹2.26M** total revenue and **60.45%** revenue variability.
- Investigated operational drivers, uncovering a **0.90** correlation between energy consumption and revenue and an almost negligible **-0.01** correlation between charging duration and energy consumption, highlighting areas for further operational investigation.
- Identified Super Fast Chargers as the most-utilised station type (**2,235** sessions) and 3W EVs as the highest-revenue segment (**₹583.5K**).

HR Analytics: Employee Workforce and Attrition Insights | MySQL, Power BI, DAX | [GitHub](#)

- Cleaned and validated a **22,214**-record employee dataset in MySQL and identified approximately **18K** active employees, **4K** terminated employees, and an overall **18%** attrition rate using SQL and Power BI.
- Pinpointed Engineering as the largest department, with approximately **6.7K** employees, and analyzed department-level termination rates and average tenure to highlight workforce and retention differences.
- Tracked hiring and termination trends over time, finding annual terminations peaked at **205** employees in **2021**, identify top job titles by workforce and termination rate.

Banking Transaction & Customer Behavior Analysis | MySQL, Power BI | [GitHub](#)

- Investigated **50K+** banking transactions across **2020–2025** using SQL to identify transaction trends, customer behavior, high-value activity, and account-level performance through **15** business-driven questions.
- Performed data-quality validation and identified demographic inconsistencies across accounts (**~93%** had multiple occupation classifications and **~95%** had multiple age values); treated demographics as transaction-level attributes to avoid unsupported customer-level conclusions.
- Designed a dashboard reporting **~\$14.9M** total transaction value, a **3.58%** high-value transaction rate, and **~\$6.85M** in long-duration transaction value.

EDUCATION

Master of Commerce — National Post Graduate College, Lucknow

CERTIFICATIONS & TRAINING

PW Skillshala Data Analytics Program with Generative AI — In Progress (Sept 2026)

DOEACC 'O' Level Certification — Programming & Problem Solving through C (Grade A) | Bleep India x E-Cell, IIT Hyderabad— GenAI Powered Data Analytics Program- In Progress (2026)
